We are pleased to bring you the top five home design trends, based on customer research and the insights of industry-leading design professionals. Check out what's on everyone's must-have list.

# 01

## QUARTZ COUNTERTOPS

Combining beauty with performance, quartz is the preferred countertop option of designers and homeowners alike. Quartz countertops are attractive and easy to care for. Unlike granite and marble, quartz is chip- and stain-resistant and doesn't require regular re-sealing. Since quartz is extremely strong, durable, and beautiful, this low-maintenance material should be a long-term favorite.

# 02

## WIDE-PLANK FLOORING

While flooring trends don't change nearly as often as do fashion trends, advancing technologies are driving an evolution. For the past two years, wide-plank wood-look luxury vinyl has been the top flooring trend. Wide-plank classic hardwood and luxury vinyl flooring options make any room feel bigger and more open, adding drama and sophistication. Rising in popularity are hand-scraped, wire-brushed, and distressed wide-plank flooring in various finishes and textures.

# 03

## CRAFTSMAN TRIM

Simplicity is the hallmark of craftsman-style trim. Clean lines and uncomplicated geometric details make craftsman trim a classic design element that lends a handcrafted touch to any room. For a simple, cohesive, and consistent aesthetic, craftsman trim remains a strong choice.

# 04

## NEUTRALS

Once again this year, neutral colors will be in. What can we say? Neutrals are classic, serene, and soothing, never busy. That's why they're such wonderful backdrops for pops of your favorite accent colors. Neutral colors come in every imaginable variation of white, with cool or warm undertones—think grays and beiges.

# 05

## LONG-LASTING LED FIXTURES AND BULBS

It's no secret that LED lighting has been in high demand in recent years, and that is not about to change. Compared with traditional light bulbs, LED bulbs are environmentally friendly, use less electricity more efficiently, produce very little heat, and last a long time. How long? If your lights are typically on 10 hours a day, expect to replace them after approximately 14 years.
